## Seminar on advanced auriculotherapy - Lyon 2012

**ENGLISH/FRENCH**

with Raphaël NOGIER (MD)

---

### Programme of Seminar 2

This seminar is an introduction to the technique using RAC or VAS, which can also be designated as the pulse of Nogier. This technique allows to considerably improve the practise of auriculotherapy by widening the action spectre of the practitioner.

### Theory

- 1) The discovery of the auriculo-cardiac reflex in 1966 by Paul Nogier
- 2) The five stages of research done by Paul Nogier
- 3) The pulse and the RAC.  
Reminder on the arterial dynamics from a physiological point of view.
  - What is behind the pulse?
  - What is behind the RAC?
- 4) The INSA experiments: the cutaneous photoperception
- 5) The white light test
- 6) The photogramme
- 7) The study of laterality using the RAC
- 8) The NOGIER frequencies: A, B, C, D, E, F, G
  - Description, how, why and when to use them?
- 9) The indications:
  - Cutaneous disorders
  - Functional disorders: migraines, constipations, diarrhoea, tachycardia
  - Food intolerance or allergy
  - Light psychiatric disorders
- 9) Treatment protocol in auriculotherapy using the RAC

### Practice

In respect to the programme, the students will assist to demonstrations of the application of different treatment techniques and treatment protocols.
